

WHAT IS THE SPACE GRILL?

Amazing, that's what it is! And the first of its kind. Space Grill is a full-sized, 3-burner grill that folds away when it's not needed. A patented internal drip system seals the unit, drip tray. In addition, the Space Grill is a high-quality stainless steel product that's incredibly easy to clean after every use.

HOW DOES IT WORK?

There are several key components to the Space Grill. Firstly, the patented hinging system allows the BBQ to sit snugly against the mounting surface. Secondly, the Space Grill folds away after use in 10 seconds or less. Thirdly, our research and development team have ensured anything that drips goes straight to the drip tray and is easy to remove after you're done with your delicious, tasty food for up to 10 people without hesitation.

WHAT FEATURES DOES IT INCLUDE?

- Made from high grade Stainless Steel, the Space Grill will be durable in all outdoor areas
- Gas connection via house main or a LPG bottle
- Storage cover functions as a splash back and heat shield when in use
- Fold out for use or fold away in 10 seconds
- Drip tray is easily removed for fat disposal and cleaning
- Patented design

WHAT ARE THE BENEFITS OF THE SPACE GRILL OVER TRADITIONAL BBQS?

The Space Grill suits almost every living arrangement as it can be tucked away when the kids are playing, yet easily set up for entertaining. This makes it a great, family-frier for those with smaller spaces that don't have the room for a full-sized grill AND play equipment for kids. Whenever you want to entertain, you just bring out your Space Grill, and suddenly, your small play area for your children is a beautiful entertainment area that any number of friends can enjoy – all thanks to the Space Grill!

WHAT ARE THE SPECS OF THE SPACE GRILL?

The Space Grill is a full size 3 burner plate and grill in a compact external bodied unit. The cooking surface measures 640mm wide x 480mm deep. The stored unit measures 200mm in depth. That's a big BBQ in a small box!

WHERE CAN I MOUNT THE SPACE GRILL?

Practically anywhere! The Space Grill is only 20kg, so it can be mounted in most areas that grills cannot usually be mounted, such as handrails! Any stand, wall, or other free

WILL THE COOKING FATS GO DOWN THE BACK WALL?

A lip across the back edge of the Space Grill prevents fats going over the back and down the wall. All fats are directed to the underside tray. When the BBQ is closed all plate front, pivoting drip tray. This can be easily removed for fat disposal and cleaning.

DOES THE SPACE GRILL MEET SAFETY STANDARDS?

Absolutely. The Space Grill has undergone extensive testing and in use emits very little heat transfer through the back of the unit. The sides are double skinned to further reduce heat storage cover inserts down behind the unit deflecting heat away from the mounting surface. The unit is certified for EK, EU, USA and Australian markets.
